Executive Breakfast Briefing on – Open Government Initiatives and Collaboration

Is your agency ready to meet the required April 7th Open Government Initiative deadline?

On December 8, 2009, the White House issued an [Open Government Directive](#) requiring federal agencies to take steps to implement the principles surrounding the three pillars on which the new presidential administration stands: transparency, participation, and collaboration.

Come to this complimentary breakfast briefing that will be limited to 25 attendees and will provide the opportunity to learn and share thought leadership on collaboration, best practices, and trends from panel members of the government community who have successfully deployed social networking initiatives in secure environments.

Date: March 16, 2010 Time: 7:30 AM – 9:30 AM

Location: Tower Club, Tysons Corner, Skyline Room

Panelists

Moderator: Bob Gourley, Former CTO of DIA and CTO of Crucial Point LLC

Panelists: Chris Rasmussen, Knowledge Manager, National Geospatial-Intelligence Agency

Todd Miller, milSuite Project Lead, milBook

Lucas Tickner, Program Manager, ManTech - A-Space

Event Schedule

- **7:30-8:00 – Registration and Breakfast**
- **8:00-9:15 – Panel Discussion**
- **9:15 – Q&A**

Registration

Please register by return email or at: events@fedresults.com

If you have any questions, please contact Jim Beaupre @ 703 318 8000 ext. (1) 0026

About Panelists

Moderator, Bob Gourley

Former CTO of DIA and CTO of Crucial Point LLC

Bob Gourley is the founder and Chief Technology Officer (CTO) of Crucial Point LLC, a technology research and advisory firm. He is a former CTO of the Defense Intelligence Agency (DIA). He was named one of the top 25 most influential CTOs in the globe by Infoworld in 2007, and selected for AFCEAs award for meritorious service to the intelligence community in 2008. Mr. Gourley is a strong advocate for user-focused software and his contributions to the Google Gadget community have placed him on Google's list of the top 200 gadget programmers in the world. He holds three masters degrees including a master of science degree in scientific and technical intelligence from Naval Postgraduate School, a master of science degree in military science from USMC university, and a master of science degree in computer science from James Madison University. Bob was the first J2 at DoD's JTF-CND/CNO and remains active in the cyber defense community.

Keynote, Chris Rasmussen

Knowledge Manager

NGA

The United States Intelligence Community (IC) has made tremendous strides over the last several years with the introduction of a wide range of social software tools such as wikis, blogs, user tagging services, and social networking services for knowledge management and information sharing. Mr. Rasmussen was instrumental in pioneering this initial push, but now believes it's time to take it to the next level.

Social software-based knowledge creation is still often viewed as "good for collaboration but not the product." Intelligence agencies still primarily vet and disseminate "their" snapshot products—often with overlap. Mr. Rasmussen evangelizes for a move toward a "living intelligence" model where a range of information is mixed together in a transparent common space and the intelligence topic is constantly updated. Living intelligence, sometimes also referred to as purple intelligence, can help reduce duplication by moving the review process into the same space where the collaboration takes place.

Mr. Rasmussen's classified blog "Need-to-Share not Need-to-Know Guy" is one of the most read and commented upon blogs in the Intelligence Community.

Mr. Rasmussen has received several prestigious awards for innovation and leadership such as the Director of National Intelligence "Exceptional Pioneer Award" in 2007 for helping pioneer the Intellipedia movement. He was selected as one of the "Federal 100" by Federal Computer Week in 2008. This award is given to top executives from government, industry and academia that had the greatest impact on the government information systems community.

Mr. Rasmussen holds a BA in History and Masters in National Security Studies.

Todd Miller

milSuite Project Lead

Symbolic Systems, Inc.

Supporting U.S. Army Program Executive Office Command, Control, and Communications Tactical (PEO C3T) MilTech Solutions Office

Mr. Todd Miller is an Army contractor with Symbolic Systems Inc. He supports the PEO C3T MilTech Solutions Office as the milSuite Project lead. milSuite is a knowledge management platform that currently includes a Military encyclopedia, milWiki, a news blog, milBlog, and a professional networking and collaborative site, milBook. milSuite uses Web 2.0 social media technologies enabling users to locate information, share knowledge and connect with people across the Department of Defense. Products of milSuite have been featured on MSNBC, Los Angeles Times, Yahoo! News, New York Times, and White House.gov. He is also responsible for

carahsoft

jive

the research and development of enterprise technologies and the expansion of information through search capabilities.

Mr. Miller has managed major technology projects for the U.S. Army including the Army Team C4ISR Knowledge Center (KC), a secure, intranet/extranet system developed as one of three original pilot programs for the Chief of Staff Army (CSA) Knowledge Office. The Army Team C4ISR portal serves a community of over 20,000 government and contractors supporting the CECOM Life Cycle Management Command (LCMC). CECOM LCMC develops, acquires, fields, supports and sustains superior Command, Control, Communications, Computers, Intelligence, Surveillance, Reconnaissance (C4ISR) and Information Systems for the Joint Warfighter.

He is a certified Project Management Professional (PMP) and graduate of Syracuse University. He has been working in the area of knowledge management and information technologies for over eight years supporting both private companies and government organizations.

Lucas Tickner
Program Manager
ManTech - A-Space

Lucas Tickner is the ManTech Program Manager for Analytic Space (A-Space) a Defense Intelligence Agency (DIA) and Office of the Director of National Intelligence (ODNI) program. Luke leads a team of 20 developers, engineers, and support personnel who maintain, develop and innovate future capabilities for the A-Space program. A-Space is a common collaborative workspace for Intelligence Community (IC) analysts that helps analysts connect with data and each other – faster, easier, and more efficiently. Luke manages the development and network teams while helping to shape the future direction of the program to provide even greater innovation to the analytic community.

Luke is a 2000 graduate of the U.S. Air Force Academy. He holds a bachelor's degree in Latin American area studies and a master's degree in business administration. Luke was an active-duty Air Force Officer for 6 years, working at the unit and headquarters level while deploying to overseas locations on 4 separate occasions, supporting both combat and humanitarian efforts. Before joining ManTech, Luke was a civilian intelligence analyst with the U.S. Air Force and also worked as a contractor supporting the Office of the Director of National Intelligence.
