

Mi-Co & FedResults Host Successful Breakfast Briefing “Computing on the Go: The Evolution of the iPad, Tablet PCs and Digital Pens”

Washington D.C. (March 02, 2010). Mi-Co co-hosted a breakfast seminar today with partner FedResults titled “Computing on the Go: The Evolution of the iPad, Tablet PCs and Digital Pens.” The briefing included a presentation by Greg Clary, PhD, CEO of Mi-Co and expert in mobile computing with 8 patents in this space. This event was held Tuesday, March 2, 2010, from 7:30-10 am, at the Tower Club Tysons Corner in Vienna, VA.

The briefing included a panel discussion with experts who have used such technology in the past to improve their businesses, and was moderated by Bob Dinkel, President of FedResults. Panelists included Ricky Stiff, former Chief of the Excise Tax division of the Internal Revenue Service (IRS), Greg Clary and Kyle Smith, Cardiovascular Information Systems Manager at Sutter Health of California. Sutter Health doctors and health care service providers serve patients in more than 100 Northern California cities and towns.

Attendees included a variety of high-level personnel from various government agencies, the military and commercial companies with federal contracts. The presentations were very well received, and attendees stayed for a considerable time after the event to test the Mi-Forms software from Mi-Co on demo Tablet PCs and Digital Pens in the room.

Bob Dinkel of FedResults says, “We were very pleased with this event. There was great turnout and engagement with the speakers, high energy and enthusiasm. We look forward to repeating this event and engaging even more people in the future to spread the word about Mi-Co’s unique technology solutions for mobile data collection and electronic data capture.”

If you would like to learn more about computing on the go and the efficiencies it could provide for your businesses and agencies, please contact us at info@mi-corporation.com. More information about this event is available at: <http://www.mi-corporation.com/page.php?pageid=204>

About Mi-Co

Mi-Co, a leading provider of mobile data collection solutions, provides software to automate paper forms-based business processes. Mi-Co’s enterprise Mi-Forms Software System provides flexible electronic forms design for data capture using digital ink and has proven capabilities for handwriting interpretation and verification, data validation and the communication of forms-based data. Mi-Forms support Tablet PCs, Digital Pens, Pocket PCs, signature capture devices and industry standard software technologies. Mi-Co is an Anoto Certified Partner delivering Digital Pen solutions since 2003. Mi-Co reaches historically paperwork intensive markets such as healthcare and government and supports an extensive network of channel partners. The company is headquartered in Research Triangle Park, North Carolina with a customer service center in Seattle, Washington. For more information on Mi-Co, visit www.mi-corporation.com
